EDUCATION

The California Polytechnic State University at San Luis Obispo

Spring 2025

B.S. in Computer Science | GPA: 3.5/4.0

Relevant Courses: Web Development, Mobile App Development, Software Engineering I, Data Structures, Algorithms, Object Oriented Programming and Design, Databases, Operating Systems I/II, Data Science, KDD

EXPERIENCE

Full Stack Software Engineer Intern | GreenSight Tech

May 2024 – September 2024

- TypeScript, Vite, React, React Native, Material UI, AWS, Git
- Contributed to the development of the device quote pricing tool
- Engineered core TypeScript components allowing users to store, create, organize, and price electronic devices
- Maximized pricing efficiency by parallelizing API logic, providing 10x more item pricing data to clients, resulting in significantly improved pricing recommendations
- Generated tests to ensure correct front-end component rendering and backend API logic

Instructional Student Assistant | Cal Poly Department of Computer Science

January 2024 - Present

- Mentored 200+ students, guiding complex solutions to both computer-science and non-technical majors
- Coordinated lab periods, answered technical questions, led debugging sessions, graded student projects
- Held resume workshops and course planning sessions to enhance students' academic and career success
- Conducted optional 1 on 1 meetings for students needing additional support

PROJECTS

ONGAWA

- Vite, TypeScript, React, AWS Amplify, Cognito, DynamoDB
- Assisted with building the backend for Ongawa's web application as a part of my senior project
- Streamlined user authentication by converting from Firebase to Cognito, emphasizing scalability and security
- Designed, implemented, and tested a Reddit-like community page for users to interact with artists
- Agile environment with weekly standups and biweekly sprint reviews to communicate progress and challenges

Let's Roll!

- Kotlin, Jetpack Compose, Material UI, Android Studio
- Mobile game where users navigate along a path using phone tilt, leveraging motion control sensors
- Followed an MVVM architecture for a maintainable and scalable code structure
- Utilized coroutines for efficient background processing and SQLite storage for persistent game data
- Managed runtime permissions to allow for push notifications to enhance user retention and engagement

Crib

- Node-JS, JavaScript, React, Express-JS, MongoDB
- Collaborated with a team of 4 to develop a web application to manage household chores
- Designed and implemented all APIs and databases on the backend, proving users with the ability to create accounts and households, track chores, assign tasks, and create group polls
- Collaborated in an Agile environment with daily standups, sprints, code reviews, timecard poker, etc.

SKILLS

Languages: Python, Java, C/C++, JavaScript/TypeScript, HTML/CSS, Kotlin, SQL, R, Racket

Technologies: React, Node-JS, Next-JS, Vite, React Native, Expo, tRPC, Cloudflare, Express-JS, MongoDB, Git, Linux/Unix, Jest, Vitest, Hadoop, AWS, Amplify, Cognito, DynamoDB, Firebase, Android Studio, XML

Personal: Leadership, Reliability, Communication, Collaboration, Mentorship
